Water Update

The Economist, May 20, 2010 Special Issue on Water

In March I sent you a notice of the *National Geographic Magazine* special issue focused on worldwide water. A lot of folks don't subscribe to the *National Geographic*, and I received many responses saying how much you appreciated the information and reference.

On May 20th *The Economist* did a similar issue focused on the economic issues of a pending worldwide water crisis. My subscription expired in February and I hadn't renewed it, so missed that one all together. (Thank you Terry Parker for the "heads up" on this information.)

Since many of my clients are either in the water enterprise business, or have critical links to water and wastewater operations, I'm sending you this notice along with the hypertext links to the articles. If you have trouble connecting directly from these links, you may have to cut and paste them into your Internet browser to get connected. You can also go to [The Economist](#) website directly and download them

I've read each of these articles and if you're any kind of a "water buffalo" they're worth your time.

Lance Decker

1. SPECIAL REPORT: *Water*

[Sources and acknowledgments](#)

The author would like to thank many people for their help in the preparation of this report, among them: May 20th 2010

2. SPECIAL REPORT: *Water*

[For want of a drink](#)

Finite, vital, much wanted, little understood, water looks unmanageable. But it needn't be, argues John Grimond. May 20th 2010

3. SPECIAL REPORT: *Water*

[Business begins to stir](#)

But many water providers still have a long way to go. May 20th 2010

4. SPECIAL REPORT: *Water*

[Enough is not enough](#)

It must also be clean. May 20th 2010

5. SPECIAL REPORT: *Water*

[To the last drop](#)

How to avoid water wars. May 20th 2010

6. LEADERS: *Water*

[The world's most valuable stuff](#)

Mostly because of farming, water is increasingly scarce. Managing it better could help. May 20th 2010

7. SPECIAL REPORT: *Water*

[Trade and conserve](#)

How to make tight supplies go further. May 20th 2010

8. SPECIAL REPORT: *Water*

[A glass half empty](#)

It won't fill up without lots of changes on the ground—and much greater restraint by users. May 20th 2010

9. UNITED STATES: *The Great Lakes' water*

[Liquid gold](#)

A long-declining region considers its most important asset. May 20th 2010

10. SPECIAL REPORT: *Water*

[Making farmers matter](#)

And monitor, budget, manage—and prosper. May 20th 2010

11. SPECIAL REPORT: *Water*

[China's peasants look to the skies](#)

But the science of yields is unyielding. May 20th 2010

12. SPECIAL REPORT: *Water*

[Every drop counts](#)

And in Singapore every drop is counted. May 20th 2010

13. SPECIAL REPORT: *Water*

[The ups and downs of dams](#)

Small projects often give better returns. May 20th 2010
